will reuse
the product

According to the reviews that participants posted at the end of the test, attention was mostly paid to the quick improvement of mood, better quality of sleep and a reduction of allergy symptoms.

Selected opinions of test participants:

There is a noticeable reduction of dust and air pollution. Also the aspect of safety and the possibility of using the product in as infant's environment was very important according to the testers.

" I did not think that a simple spray could significantly improve the life of an allergist. I am positively surprised by the effects of the spray. The product is efficient and easy to apply. It improves the comfort of daily life. I can highly recommend it to everyone. It is a wonderful product, easy to use, great relief in allergy symptoms."

" The effect of Allergoff spray has definitely reduced the occurrence of allergic reactions for me and my child. The quality of sleep has improved, coughing at night has practically disappeared, and the skin has softened. I would definitely use Allergoff spray again and would recommend it to others struggling with persistent allergy symptoms. For us, so far, No. 1 among cosmetics that neutralize allergens."

" Allergoff Spray has positively surprised me. We do not sneeze so persistently, and I stopped coughing at night. Furthermore, my son does not wake up with the effect of a blocked nose. We sleep better and more comfortably"

" Allergoff spray is a great solution for people allergic to house dust mites. Applied to mattresses, quilts, curtains, and teddy bears, it visibly reduces allergy and asthma symptoms after just a few days. I can highly recommend it."

" I have the feeling that right after a single use on cleaned surfaces, there's a scent of freshness and you can't smell any dust. I really noticed an improvement, even though at first I didn't believe it, but after a few days my daughter no longer had a runny nose, and her conjunctivitis just disappeared (I also applied eye drops a few times). Moreover, I noticed a slight improvement in the appearance of my daughter's skin – it's less dry and the red spots are almost invisible. It's a very good product, reliable and effective; it's just a shame it's not cheaper."

" Allergoff is, in my opinion, a must-have product when struggling with allergies. My son feels much better. The symptoms have decreased when it comes to the skin. I have the impression that he sleeps better at night - no coughing. The product is very convenient and efficient. It will definitely stay with us for a longer period of time, as I am extremely curious about its further results."

" I am positively surprised by the results after using Allergoff Spray. Allergy symptoms were especially evident in my older daughter. After spraying the mattress, quilt and pillow, the quality of sleep undoubtedly improved and allergy symptoms were definitely less visible. We will surely use this spray again. It is also safe for infants, which was important to me having such a young child at home."

" I am very satisfied because my children cough less and do not snore in their sleep. And during the day even when they jump on the bed they don't scratch as intensively as they used to."

" I achieved what I wanted - more calmness, much less allergy complaints."

3% of testers said they did not notice a difference after using the product.
